16. LITIGATION

The Company is a party to routine legal proceedings arising out of the normal course of business. Although it is not possible to predict with certainty the outcome of these unresolved legal actions or the range of possible loss, the Company believes at this time that none of these actions, individually or in the aggregate, will have a material adverse effect on the consolidated financial condition, results of operations or cash flows of the Company. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.

17. FAIR VALUE MEASUREMENTS

ASC 820 Fair Value Measurements establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers are defined as:

Level 1 – Quoted prices in active markets for identical instruments;

Level 2 – Inputs other than quoted prices in active markets that are either directly or indirectly observable.

Level 3 – Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Assets and liabilities measured at fair value on a recurring basis consisted of the following (in thousands):

	<u>March 31, 2010</u>			<u>December 31, 2009</u>		
	<u>Total</u>	<u>Level 1</u>	<u>Levels 2&3</u>	<u>Total</u>	<u>Level 1</u>	<u>Levels 2&3</u>

18. RECENTLY ISSUED ACCOUNTING STANDARDS

Fair Value Measurements and Disclosures

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2010-06, “Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements.” This guidance requires new disclosures for transfers in and out of Level 1 and Level 2 fair value measurements. This guidance requires separate presentation about purchases, sales, issuances, and settlements for activity in Level 3 fair value measurements. ASU 2010-06 also clarifies existing fair value disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. The guidance for new disclosures and clarifications of existing disclosures was effective for interim and annual reporting periods beginning after December 15, 2009. The adoption of this part of the guidance had no material effect on the Company’s financial position, results of operations or cash flows. The guidance related to presentation of Level 3 fair value measurements is effective for fiscal years beginning after December 15, 2010. The adoption of this part of the guidance is not expected to have a material effect on the Company’s financial position, results of operations or cash flows.

Subsequent Events

In February 2010, the FASB issued ASU 2010-9, “Subsequent Events (Topic 855) – Amendments to Certain Recognition and Disclosure Requirements.” This guidance removes the requirement for an entity that files financial statements with the Securities and Exchange Commission to disclose a date through which subsequent events have been evaluated. This guidance was effective immediately. The adoption of this guidance had no material effect on the Company’s financial position, results of operations or cash flows.

The note guarantees are full and unconditional, joint and several obligations of the guarantors. Non-guarantors consist primarily of foreign subsidiaries of the Company, which are organized outside the United States of America. The following condensed consolidating financial statements are presented using the equity method of accounting.

Financial Condition and Results of Operations

OVERVIEW

Titan International, Inc. and its subsidiaries are leading manufacturers of wheels, tires and assemblies for off-highway vehicles used in the agricultural, earthmoving/construction and consumer markets. Titan manufactures both wheels and tires for the majority of these market applications, allowing the Company to provide the value-added service of delivering complete wheel and tire assemblies. The Company offers a broad range of products that are manufactured in relatively short production runs to meet the specifications of original equipment manufacturers (OEMs) and/or the requirements of aftermarket customers.

Agricultural Market: Titan's agricultural rims, wheels and tires are manufactured for use on various agricultural and forestry equipment, including tractors, combines, skidders, plows, planters and irrigation equipment, and are sold directly to OEMs and to the aftermarket through independent distributors, equipment dealers and Titan's own distribution centers.

Earthmoving/Construction Market: The Company manufactures rims, wheels and tires for various types of off-the-road (OTR) earthmoving, mining, military and construction equipment, including skid steers, aerial lifts, cranes, graders and levelers, scrapers, self-propelled shovel loaders, articulated dump trucks, load transporters, haul trucks and backhoe loaders. The earthmoving/construction market is often referred to as OTR, an acronym for off-the-road.

Consumer Market: Titan builds select products for all-terrain vehicles (ATV), turf, golf and trailer applications. The Company provides wheels/tires and assembles brakes, actuators and components for the domestic boat, recreational and utility trailer markets.

The Company's major OEM customers include large manufacturers of off-highway equipment such as AGCO Corporation, Caterpillar Inc., CNH Global N.V., Deere & Company and Kubota Corporation, in addition to many other off-highway equipment manufacturers. The Company distributes products to OEMs, independent and OEM-affiliated dealers, and through a network of distribution facilities.

The following table provides highlights for the quarter ended March, 2010, compared to 2009 (amounts in thousands):

	Three months ended March 31,		<u>% Decrease</u>
	<u>2010</u>	<u>2009</u>	
Net sales	\$ 196,448	\$ 232,604	(16)%
Gross profit	26,087	30,063	(13)%
Income from operations	10,130	14,077	(28)%
Net income	2,078	7,041	(70)%

The Company recorded sales of \$196.4 million for the first quarter of 2010, which were 16% lower than the first quarter 2009 sales of \$232.6 million. The lower sales were primarily the result of reduced demand in the Company's agricultural market which was down by approximately 19% when compared to last year's first quarter.

The following operating results were primarily related to the reduced sales levels and the associated negative impact on the Company's operating profit. The Company's gross profit was \$26.1 million for the first quarter of 2010, compared to \$30.1 million in 2009. Net income was \$2.1 million for the quarter, compared to \$7.0 million in 2009. Basic earnings per share were \$.06 in the first quarter of 2010, compared to \$.20 in 2009.

Management's Discussion and Analysis of
Financial Condition and Results of Operations

CRITICAL ACCOUNTING ESTIMATES

Preparation of the financial statements and related disclosures in compliance with accounting principles generally accepted in the United States of America requires the application of appropriate technical accounting rules and guidance, as well as the use of estimates. The Company's application of these policies involves assumptions that require difficult subjective judgments regarding many factors, which, in and of themselves, could materially impact the financial statements and disclosures. A future change in the estimates, assumptions or judgments applied in determining the following matters, among others, could have a material impact on future financial statements and disclosures.

Inventories

Inventories are valued at lower of cost or market. Cost is determined using the first-in, first-out (FIFO) method for approximately 74% of inventories and the last-in, first-out (LIFO) method for approximately 26% of inventories. The major rubber material inventory and related work-in-process and their finished goods are accounted for under the FIFO method. The major steel material inventory and related work-in-process and their finished goods are accounted for under the LIFO method. Market value is estimated based on current selling prices. Estimated provisions are established for slow-moving and obsolete inventory, as well as inventory carried above market price based on historical experience. Should there be an adverse change in experience, increases to estimated provisions would be necessary.

Income Taxes

Deferred income tax provisions are determined using the liability method whereby deferred tax assets and liabilities are recognized based upon temporary differences between the financial statement and income tax basis of assets and liabilities. The Company assesses the realizability of its deferred tax asset positions and recognizes and measures uncertain tax positions in accordance with ASC 740 Income Taxes.

As a result of the 2009 net loss, the Company has a net operating loss carryforward for income tax purposes. If Titan would continue to incur net losses, the Company may not be able to realize the tax benefit of these net operating losses.

Asset and Business Acquisitions

The allocation of purchase price for asset and business acquisitions requires management estimates and judgment as to expectations for future cash flows of the acquired assets and business and the allocation of those cash flows to identifiable intangible assets in determining the estimated fair value for purchase price allocations. If the actual results differ from the estimates and judgments used in determining the purchase price allocations, impairment losses could occur relating to any intangibles recorded in the acquisition. To aid in establishing the value of any intangible assets at the time of acquisition, the Company typically engages a professional appraisal firm.

Retirement Benefit Obligations

Pension benefit obligations are based on various assumptions used by third-party actuaries in calculating these amounts. These assumptions include discount rates, expected return on plan assets, mortality rates and other factors. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and obligations. The Company has three frozen defined benefit pension plans and one defined benefit plan that previously purchased a final annuity settlement. During the first three months of 2010, the Company contributed cash funds of \$0.1 million to its frozen pension plans. Titan expects to contribute approximately \$2 million to these frozen defined pension plans during the remainder of 2010. For more information concerning these costs and obligations, see the discussion of the "Pensions" and Note 20 to the Company's financial statements on Form 10-K for the fiscal year ended December 31, 2009.

Management's Discussion and Analysis of
Financial Condition and Results of Operations

RESULTS OF OPERATIONS

Highlights for the three months ended March 31, 2010, compared to 2009 (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Net sales	\$ 196,448	\$ 232,604
Cost of sales	<u>170,361</u>	<u>202,541</u>
Gross profit	\$ 26,087	\$ 30,063
<i>Gross profit margin</i>	<i>13.3%</i>	<i>12.9%</i>

Net Sales

Net sales for the quarter ended March 31, 2010, were \$196.4 million, compared to \$232.6 million in 2009. The sales decreased by approximately 16%, primarily the result of reduced demand in the Company's agricultural market, which was down by approximately 19% when compared to last year's first quarter. The Company believes the agricultural industry, along with the earthmoving/construction and consumer markets, are continuing to be affected by the on-going uncertainty in domestic and global economic conditions.

Cost of Sales and Gross Profit

Cost of sales was \$170.4 million for the first quarter of 2010, compared to \$202.5 million in 2009. The lower cost of sales resulted primarily from the reduction in the quarterly sales levels. The cost of sales decreased by approximately 16%, the same percentage as the net sales.

Gross profit for the first quarter of 2010 was \$26.1 million, or 13.3% of net sales, compared to \$30.1 million, or 12.9% of net sales, for the first quarter of 2009. The gross profit margin showed a slight improvement despite the reduction in sales, primarily due to improved manufacturing efficiencies, including reduced headcount, in the Company's agricultural segment.

Selling, General and Administrative Expenses

Selling, general and administrative expenses were as follows (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Selling, general and administrative	\$ 11,809	\$ 12,528
<i>Percentage of net sales</i>	<i>6.0%</i>	<i>5.4%</i>

Selling, general and administrative (SG&A) expenses for the first quarter of 2010 were \$11.8 million, or 6.0% of net sales, compared to \$12.5 million, or 5.4% of net sales, for 2009. When the SG&A expenses are expressed as a percentage of net sales, the percentage is higher due to the lower sales levels. Selling expenses decreased approximately \$0.5 million, primarily as the result of the lower sales levels.

Research and Development Expenses

Research and development expenses were as follows (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Research and development	\$ 2,027	\$ 999
<i>Percentage of net sales</i>	<i>1.0%</i>	<i>0.4%</i>

Research and development (R&D) expenses were \$2.0 million, or 1.0% of net sales, for the first quarter of 2010 as compared to \$1.0 million, or 0.4% of net sales, for the first quarter of 2009. The additional R&D costs recorded during the first quarter of approximately \$1 million primarily related to the giant off-the-road (OTR) products.

Royalty Expense

Royalty expense was as follows (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Royalty expense	\$ 2,121	\$ 2,459

The Company has a trademark license agreement with The Goodyear Tire & Rubber Company to manufacture and sell certain off-highway tires in North America under the Goodyear name. Royalty expenses were \$2.1 million and \$2.5 million for the first quarter of 2010 and 2009, respectively. As sales subject to the trademark license agreement were lower, the Company's royalty expense for the first quarter of 2010 was reduced accordingly.

Income from Operations

Income from operations was as follows (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Income from operations	\$ 10,130	\$ 14,077
<i>Percentage of net sales</i>	5.2%	6.1%

Income from operations for the first quarter of 2010 was \$10.1 million, or 5.2% of net sales, compared to \$14.1 million, or 6.1% of net sales, in 2009. This reduction was the net result of the items discussed in the (i) sales, (ii) cost of sales, (iii) selling general and administrative, (iv) research and development and (v) royalty line items.

Interest Expense

Interest expense was as follows (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Interest expense	\$ 7,056	\$ 3,944

Interest expense was \$7.1 million for the first quarter of 2010, compared to \$3.9 million in 2009. The Company's interest expense for the first quarter of 2010 increased from the previous year primarily as a result of interest expense related to the convertible senior subordinated 5.625% notes that were issued in December of 2009.

Other Income

Other income was as follows (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Other income	\$ 333	\$ 1,409

Other income for the first quarter of 2010 was \$0.3 million, compared to \$1.4 million in 2009. A gain on senior note repurchases of \$1.4 million was included in other income for the first quarter of 2009.

Income Taxes

Income taxes were as follows (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Income tax expense	\$ 1,329	\$ 4,501

The Company recorded income tax expense of \$1.3 million and \$4.5 million for the quarters ended March 31, 2010 and 2009, respectively. The Company's effective income tax rate was 39% for each of the three months ended March 31, 2010 and 2009.

Net Income

Net income was as follows (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Net income	\$ 2,078	\$ 7,041

Net income for the first quarter of 2010 was \$2.1 million, compared to \$7.0 million in 2009. Basic earnings and diluted earnings per share were each \$.06 for the first quarter of 2010, compared to \$.20 in the first quarter of 2009. The Company's net income and earnings per share were lower due to the items previously discussed.

Agricultural Segment Results

Agricultural segment results were as follows (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Net sales	\$ 151,112	\$ 187,328
Gross profit	23,890	24,920
Income from operations	19,955	20,085

Net sales in the agricultural market were \$151.1 million for the first quarter of 2010, as compared to \$187.3 million in 2009. The Company's agricultural segment sales were approximately 19% lower than the sales recorded in the first quarter of 2009. Although lower than the previous year's first quarter, agricultural segment sales for the first quarter of 2010 were significantly higher than those recorded in the third and fourth quarters of the previous year.

Gross profit in the agricultural market was \$23.9 million for the first quarter of 2010, compared to \$24.9 million in 2009. Income from operations in the agricultural market was \$20.0 million for the first quarter of 2010, compared to \$20.1 million for the first quarter of 2009. Despite the lower sales, the gross profit and income from operations were nearly the same due to improved manufacturing efficiencies, including reduced headcount, in the agricultural segment.

Earthmoving/Construction Segment Results

Earthmoving/Construction segment results were as follows (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Net sales	\$ 41,815	\$ 39,927
Gross profit	3,150	4,884
Income from operations	690	3,840

The Company's earthmoving/construction market net sales were \$41.8 million for the first quarter of 2010, as compared to \$39.9 million in 2009. The sales in the earthmoving/construction segment remain at low levels, off nearly 50 percent from 2007 highs. A primary reason for the low sales levels in this segment was the continued weakness in the construction areas related to commercial, residential and infrastructure industries.

Gross profit in the earthmoving/construction market was \$3.2 million for the first quarter of 2010, as compared to \$4.9 million in 2009. Income from operations in the earthmoving/construction market was \$0.7 million for the first quarter of 2010 versus \$3.8 million in 2009. First quarter 2010 income from operations in the earthmoving/construction segment was negatively impacted by manufacturing inefficiencies including depreciation on the giant OTR assets of approximately \$1 million and higher R&D expenses of approximately \$1 million related to giant OTR products.

Consumer Segment Results

Consumer segment results were as follows (amounts in thousands):

	Three months ended March 31,	
	<u>2010</u>	<u>2009</u>
Net sales	\$ 3,521	\$ 5,349
Gross profit	668	788
Income from operations	581	637

Consumer market net sales were \$3.5 million for the first quarter of 2010, as compared to \$5.3 million in 2009. The continued reduction in consumer market sales is attributed to the sustained contraction in consumer discretionary spending resulting from the on-going economic conditions.

Gross profit from the consumer market was \$0.7 million for the first quarter of 2010, as compared to \$0.8 million in 2009. Consumer market income from operations was \$0.6 million for each of the three months ended March 31, 2009 and 2010. The consumer segment continues as a complementary and contributing part of the Company's overall business.

Corporate expenses for the first quarter of 2010 were composed of selling and marketing expenses of approximately \$4½ million and administrative expenses of approximately \$6½ million.

Corporate expenses for the first quarter of 2009 were composed of selling and marketing expenses of approximately \$5 million and administrative expenses of approximately \$5½ million.

Corporate administrative expenses were approximately \$1 million higher in the first quarter of 2010 primarily as the result of higher group insurance expenses that were recorded on corporate entities.

MARKET RISK SENSITIVE INSTRUMENTS

The Company's risks related to foreign currencies, commodity prices and interest rates are consistent with those for 2009. For more information, see the "Market Risk Sensitive Instruments" discussion in the Company's Form 10-K for the fiscal year ended December 31, 2009.

LIQUIDITY AND CAPITAL RESOURCES

Cash Flows

As of March 31, 2010, the Company had \$215.2 million of cash balances within various bank accounts. This cash balance decreased by \$14.0 million from December 31, 2009, due to the following cash flow items.

(amounts in thousands)	March 31, <u>2010</u>	December 31, <u>2009</u>
Cash	\$ 215,215	\$ 229,182

Cash used for operating activities	\$ (10,139)	\$ (14,004)	\$ 3,865

For the first quarter of 2010, operating activities used cash of \$10.1 million. This cash was primarily used by increases in accounts receivable and inventory of \$34.8 million and \$19.5 million, respectively, offset by higher accounts payable of \$22.4 million. Net income of \$2.1 million included \$9.3 million of noncash charges for depreciation and amortization. Deferred tax assets were reduced by \$1.3 million as the Company used current income to reduce the deferred tax asset for previously recorded net operating losses.

In the first quarter of 2009, operating activities used cash of \$14.0 million. This cash was primarily used by increases in inventory of \$20.3 million and a reduction in accounts payable of \$11.6 million, offset by net income of \$7.0 million. Included in net income were \$8.0 million of noncash charges for depreciation and amortization.

Operating cash flows increased \$3.9 million when comparing the first quarter of 2010 to the first quarter of 2009. Net income in the first quarter of 2010 was \$5.0 million lower than net income in the first quarter of 2009. When comparing the first quarter of 2010 to the first quarter of 2009, cash flows from accounts receivable decreased \$35.5 million and cash flows from accounts payable increased \$34.0 million. This is the result of major increases in accounts receivable and accounts payable in the first quarter of 2010, as sales increased approximately 34% when comparing the first quarter of 2010 to the previous quarter (fourth quarter of 2009). In the first quarter of 2009, sales were more in line with that of the previous quarter.

Of the \$19.9 million of capital expenditures in the first quarter of 2009, approximately \$12 million related to the Company's giant OTR mining project, which was substantially completed at the end of 2009. The remaining 2009 and the 2010 expenditures represent various equipment purchases and improvements to enhance production capabilities. Other investing activities in the first quarter of 2009 related primarily to the Company's \$2.4 million purchase of additional shares in Titan Europe Plc.

Management's Discussion and Analysis of
Financial Condition and Results of Operations

Debt Covenants

The Company's revolving credit facility (credit facility) contains various covenants and restrictions. The financial covenants in this agreement require that:

- Collateral coverage be equal to or greater than 1.2 times the outstanding revolver balance.
- If the 30-day average of the outstanding revolver balance exceeds \$125 million, the fixed charge coverage ratio be equal to or greater than a 1.0 to 1.0 ratio.

Restrictions include:

- Limits on payments of dividends and repurchases of the Company's stock.
- Restrictions on the ability of the Company to make additional borrowings, or to consolidate, merge or otherwise fundamentally change the ownership of the Company.
- Limitations on investments, dispositions of assets and guarantees of indebtedness.
- Other customary affirmative and negative covenants.

These covenants and restrictions could limit the Company's ability to respond to market conditions, to provide for unanticipated capital investments, to raise additional debt or equity capital, to pay dividends or to take advantage of business opportunities, including future acquisitions. The failure by Titan to meet these covenants could result in the Company ultimately being in default on these loan agreements.

The Company is in compliance with these covenants and restrictions as of March 31, 2010. The collateral coverage ratio was not applicable as there were no outstanding borrowings under the revolving credit facility at March 31, 2010. The fixed charge coverage ratio did not apply for the quarter ended March 31, 2010. In connection with the convertible senior subordinated note offer, Titan previously agreed to add an additional mutually agreeable covenant to the Company's revolving credit facility, which is now no longer required by mutual agreement of the parties.

Other Issues

The Company's business is subject to seasonal variations in sales that affect inventory levels and accounts receivable balances. Historically, Titan tends to experience higher sales demand in the first and second quarters.

Liquidity Outlook

At March 31, 2010, the Company had \$215.2 million of cash and cash equivalents and no outstanding borrowings on the Company's \$150.0 million credit facility.

Capital expenditures for the remainder of 2010 are forecasted to be approximately \$10 million to \$12 million. Cash payments for interest are currently forecasted to be approximately \$13 million for the remainder of 2010 based on March 31, 2010, debt balances.

In the future, Titan may seek to grow by making acquisitions which will depend on the ability to identify suitable acquisition candidates, to negotiate acceptable terms for their acquisition and to finance those acquisitions. In September 2009, Titan signed a letter of intent with The Goodyear Tire & Rubber Company to purchase certain farm tire assets, including the Goodyear Dunlop Tires France (GDTF) Amiens North factory. This agreement is non-binding and will be subject to GDTF's satisfactory completion of a social plan related to consumer tire activity at the Amiens North facility, along with completion of due diligence, a definitive acquisition agreement and other standard acquisition approval requirements. At this time, the due diligence process continues. There is no assurance that definitive agreements will be executed or that the acquisition will be consummated.

Subject to the terms of indebtedness, the Company may finance future acquisitions with cash on hand, cash from operations, additional indebtedness and/or by issuing additional equity securities.

Cash on hand, anticipated internal cash flows from operations and utilization of remaining available borrowings are expected to provide sufficient liquidity for working capital needs, capital expenditures and potential acquisitions. If the Company were to exhaust all currently available working capital sources or not meet the financial covenants and conditions of its loan agreements, the Company's ability to secure additional funding would be negatively impacted.

Financial Condition and Results of Operations

PENSIONS

The Company has three frozen defined benefit pension plans and one defined benefit plan that previously purchased a final annuity settlement. These plans are described in Note 20 of the Company's Notes to Consolidated Financial Statements in the 2009 Annual Report on Form 10-K.

The Company's recorded liability for pensions is based on a number of assumptions, including discount rates, rates of return on investments, mortality rates and other factors. Certain of these assumptions are determined by the Company with the assistance of outside actuaries. Assumptions are based on past experience and anticipated future trends. These assumptions are reviewed on a regular basis and revised when appropriate. Revisions in assumptions and actual results that differ from the assumptions affect future expenses, cash funding requirements and the carrying value of the related obligations. Titan expects to contribute approximately \$2 million to these frozen defined pension plans during the remainder of 2010.

NEW ACCOUNTING STANDARDS

Fair Value Measurements and Disclosures

In January 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2010-06, "Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements." This guidance requires new disclosures for transfers in and out of Level 1 and Level 2 fair value measurements. This guidance requires separate presentation about purchases, sales, issuances, and settlements for activity in Level 3 fair value measurements. ASU 2010-06 also clarifies existing fair value disclosures about the level of disaggregation and about inputs and valuation techniques used to measure fair value. The guidance for new disclosures and clarifications of existing disclosures was effective for interim and annual reporting periods beginning after December 15, 2009. The adoption of this part of the guidance had no material effect on the Company's financial position, results of operations or cash flows. The guidance related to presentation of Level 3 fair value measurements is effective for fiscal years beginning after December 15, 2010. The adoption of this part of the guidance is not expected to have a material effect on the Company's financial position, results of operations or cash flows.

Subsequent Events

In February 2010, the FASB issued ASU 2010-9, "Subsequent Events (Topic 855) – Amendments to Certain Recognition and Disclosure Requirements." This guidance removes the requirement for an entity that files financial statements with the Securities and Exchange Commission to disclose a date through which subsequent events have been evaluated. This guidance was effective immediately. The adoption of this guidance had no material effect on the Company's financial position, results of operations or cash flows.

TITAN INTERNATIONAL, INC.
Management's Discussion and Analysis of
Financial Condition and Results of Operations

MARKET CONDITIONS AND OUTLOOK

The on-going uncertainty in domestic and global economic conditions makes it difficult to forecast future sales levels. In the first quarter of 2010, Titan experienced a sales decline as compared to the first quarter of 2009. Titan may experience continued sales declines in each of the Company's markets for the first part of 2010. Although the short-term outlook is for continued sales declines, the Company has seen signs that the market may currently be experiencing the bottom of the cycle. Titan's total sales for the first quarter of 2010 increased by approximately 34% when compared to last year's fourth quarter. The Company is cautiously optimistic that sales may continue to move higher during the remainder of 2010; however, there can be no assurance that the decline in sales will not resume.

Energy, raw material and petroleum-based product costs have been exceptionally volatile and may negatively impact the Company's margins. Many of Titan's overhead expenses are fixed; therefore, lower seasonal trends may cause negative fluctuations in quarterly profit margins and affect the financial condition of the Company.

AGRICULTURAL MARKET OUTLOOK

Agricultural market sales were down in the first quarter of 2010 when compared to the first quarter of 2009. However, agricultural market sales increased over 36% when compared to last year's fourth quarter. Commodity prices have declined from recent highs, but remain above the long-term average. The gradual increase in the use of biofuels may help sustain future production. However, the magnitude and duration of the domestic and global economic downturn makes it extremely difficult to forecast future sales levels. Many variables, including weather, grain prices, export markets and future government policies and payments can greatly influence the overall health of the agricultural economy.

EARTHMOVING/CONSTRUCTION MARKET OUTLOOK

Sales for the earthmoving/construction market are expected to remain challenging for the rest of 2010 as a result of the on-going uncertainty in domestic and global economic conditions. The magnitude and duration of these conditions make it difficult to forecast future sales levels. Metals, oil and gas prices have retreated from 2008's highs as a result of the current economic conditions. In the long-term, these prices are expected to return to levels that are attractive for continued investment, which should help support future earthmoving and mining sales. However, many producers are currently delaying new investments which will affect future sales levels. The significant decline in the United States housing market continues to cause a major reduction in demand for equipment used for construction. The earthmoving/construction segment is affected by many variables, including commodity prices, road construction, infrastructure, government appropriations, housing starts and the on-going banking and credit issues. For the remainder of 2010, the Company expects modest improvement compared to the previous year's low sales levels in the earthmoving/construction market.

CONSUMER MARKET OUTLOOK

Consumer discretionary spending has experienced a major contraction as a result of on-going economic issues, housing market decline, and high unemployment rates. Many of the Company's consumer market sales are ultimately used in items which fall into the discretionary spending category. There is no clear consensus among economists as to when there will be a sustained consumer spending rebound. Many factors continue to affect the consumer market including weather, competitive pricing, energy prices and consumer attitude. For the remainder of 2010, the Company expects continued weakness in consumer spending related to Titan's consumer market.

The Company's principal executive officer and principal financial officer have concluded the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) are effective as of the end of the period covered by this Form 10-Q based on an evaluation of the effectiveness of disclosure controls and procedures.

Changes in Internal Controls

There were no material changes in internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) that occurred during the first quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Because of its inherent limitations, internal controls over financial reporting may not prevent or detect misstatements. Also, projections of any evaluations of the effectiveness to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Item 1. Legal Proceedings

The Company is a party to routine legal proceedings arising out of the normal course of business. However, due to the difficult nature of predicting unresolved and future legal claims, the Company cannot anticipate or predict the material adverse effect on its consolidated financial condition, results of operations or cash flows as a result of efforts to comply with or its liabilities pertaining to legal judgments.
